QuadraLite™

a truly **unique** anaesthetic face mask

Soft seal
A comfortable airtight fit with flexibility for different face sizes

Transparent shell
For excellent visibility

Colour coding
Colour matching with other Intersurgical products for easy selection

Anatomical shape
Provides a precise fit combined with lower dead space

### Unique Design Developed by Intersurgical

QuadraLite™ does not use an inflatable cushion. Innovative moulding techniques have enabled the combination of two ideally suited materials allowing the creation of a face mask with an anatomical shape and soft seal. This provides a comfortable, superior airtight fit with a crystal clear shell to enhance patient visibility.

Four Sizes for all Patients

The mask is lightweight and requires only minimal pressure to achieve a seal over a wide range of face sizes and shapes. Only four sizes instead of the traditional seven provide a solution for all patients.

The Greener, Safer Choice

QuadraLite™ is part of the Intersurgical Eco Range of products containing no PVC which are designed to have a low environmental impact. Masks are phthalate free to protect the patient and a serial number for patient records and traceability is etched directly onto every mask.
