QuadraLite™ anaesthetic masks

22F

Transparent shell
For excellent visibility

Anatomical shape
Provides a precise fit combined
with lower dead space

Soft seal
A comfortable airtight fit with
flexibility for different face sizes

Colour-coding
For easy identification
of size and selection

Unique design developed by Intersurgical

QuadraLite does not use an inflatable cushion. Innovative
moulding techniques have enabled the combination of two
ideally suited materials allowing the creation of a face mask
with an anatomical shape and soft seal. This provides a
comfortable, superior airtight fit with a crystal clear shell to
enhance patient visibility.

Four sizes for all patients

The mask is lightweight and requires only minimal pressure
to achieve a seal over a wide range of face sizes and shapes.
Only four sizes instead of the traditional seven provide a
solution for all patients.

The greener, safer choice

QuadraLite is part of the Intersurgical Eco Range of products
containing no PVC which are designed to have a low
environmental impact. Masks are phthalate free to protect the
patient and a serial number for patient records and traceability
is etched directly onto every mask.
