

Resuscitation and emergency care products

The complete solution

Intersurgical can offer you a complete range of products for use in an emergency and resuscitation situation. From initial mouth-to-mask ventilation, to airway management, oxygen therapy and accessories, you will find the products you need in this information sheet.

Bag-Valve-Mask (BVM) resuscitation systems

In an emergency situation time is vital, there is no opportunity to check patient history and expensive re-usable equipment can often become contaminated. To avoid cross infection from blood, vomit and secretions we offer a complete range of single use BVM systems for use in resuscitation and emergency care.

Bag-Valve-Mask (BVM) resuscitation systems

Code	Description	Mask Size	Box Qty.
7152000	Adult, BVM resuscitation system, 1.5L bag	5	6
7153000	Adult, BVM resuscitation system, 1L bag with pressure relief valve (40cm H ₂ O)	4	6
7151000	Paediatric, BVM resuscitation system, 550ml bag with pressure relief valve (40cm H ₂ O)	3	5
7154000	Paediatric, BVM resuscitation system, 550ml bag with pressure relief relief valve (40cm H ₂ O)	1	5
7150000	Infant, BVM resuscitation system, 280ml bag with pressure relief valve (40cm H ₂ O)	1	5

7161000	PEEP valve adapter for use with BVM resuscitation systems	10
7160000	Inline manometer for use with BVM resuscitation systems and Mapleson C systems	20
● 2205000	C-PEEP fixed value valve, blue, preset at 5cm H ₂ O	5
● 2202000	C-PEEP fixed value valve, black, preset at 2.5cm H ₂ O	5

Pocket resuscitation mask

Mouth-to-mouth is the traditional means of giving immediate respiratory support. Due to the increasing incidence of infectious disease and the inherent unhygienic nature of the practice, there may be a natural reluctance to carry it out. Intersurgical offers a convenient ready to use mouth-to-mask device that allows for immediate respiratory support to the patient without compromising the safety of the rescuer.

The one-way protection valve allows gas to pass from the rescuer to patient without any physical contact between the two

Tamper evident label

Code	Description	Box Qty.
1158000	Pocket mask with supplementary oxygen connector, headstrap, filter and protective carry case	16

Adult bagging systems – Mapleson C

The versatile Mapleson C System is ideally suited for use in intensive care, recovery areas and accident and emergency departments. Used for induction of anaesthesia, resuscitation, patient transport and ‘bagging’, the system offers more ‘feel’ of the patient’s lung compliance than that provided by a BVM resuscitation system.

👁 2108000 (S*)	Adult, Mapleson C bagging system with 2L bag, 1.8m	15 (12*)
7160000	Inline manometer for use with BVM resuscitation systems and Mapleson C systems	20

Paediatric bagging systems

Available in 0.5 and 1 litre options, this paediatric version of the universally accepted adult bagging system incorporates a CO₂ monitoring elbow at the patient connection for direct sampling. This system can be utilised in a wide range of clinical applications including physiotherapy, patient transfer, resuscitation, and may be used for both spontaneously breathing and hand ventilated patients in theatre and recovery.

One-piece Guedel airways

The innovative design of the One-piece Guedel range eliminates the separate bite block found in all conventional moulded designs. The design also incorporates a soft atraumatic tip.

i-gel® supraglottic airway

i-gel has a host of features that provide significant benefits to the patient and the clinician.

The i-gel is a truly unique, single use, latex and PVC free supraglottic airway with a non-inflatable cuff, available in a full range of adult and paediatric sizes. i-gel incorporates a gastric channel to improve and enhance patient safety, an integral bite block to reduce the possibility of airway channel occlusion and buccal cavity stabiliser to aid insertion and avoid the potential for rotation.

www.i-gel.com

15mm connector

Reliable connection to any standard catheter mount or connection

Proximal end of gastric channel

Clearly displayed product information

For quick easy reference. Includes confirmation of size and weight guidance

Position guide (adult sizes only)

Easy confirmation of optimum insertion depth

Gastric channel

The i-gel incorporates a gastric channel (except size 1) to improve and enhance patient safety. It allows for suctioning, passing of a nasogastric tube and facilitates venting

Integral bite block

Reduces the possibility of airway channel occlusion

Buccal cavity stabiliser

Aids insertion and eliminates the potential for rotation

Epiglottic rest

Reduces the possibility of epiglottic 'down folding' and airway obstruction

The non-inflatable cuff

Made from a unique soft gel-like material allowing ease of insertion and reduced trauma

Distal end of gastric channel

INTERSURGICAL
 COMPLETE RESPIRATORY SYSTEMS
i-gel[®] O₂

i-gel[®] O₂ Resus Pack

In emergency medicine, you need equipment that's easy, rapid and reliable to use. The i-gel O₂ Resus Pack contains everything you need to prepare, insert and secure the i-gel O₂ quickly and efficiently: an i-gel O₂ supraglottic airway, a sachet of lubricant, airway support strap and a suction tube.

Pack content

Supplementary oxygen port

For the administration of passive oxygenation as a component of cardiocerebral resuscitation (CCR)

Colour coded hook ring

To secure the i-gel O₂ in position with the airway support strap

Code	Description	Size	Weight	Box Qty.
8705000	i-gel O ₂ Resus Pack, large adult – includes i-gel O ₂ with orange hook ring, sachet of lubricant, airway support strap and a 12FG suction tube	5	90+kg	6
8704000	i-gel O ₂ Resus Pack, medium adult – includes i-gel O ₂ with green hook ring, sachet of lubricant, airway support strap and a 12FG suction tube	4	50–90kg	6
8703000	i-gel O ₂ Resus Pack, small adult – includes i-gel O ₂ with yellow hook ring, sachet of lubricant, airway support strap and a 12FG suction tube	3	30–60kg	6

Solus™ Standard laryngeal mask airways

In addition to the i-gel® we can also offer the Solus range of single use laryngeal mask airways which incorporates all of the traditional design features of such a device and is thus ideally suited for use in cardiopulmonary resuscitation. This quality product is provided at a price that makes their storage in resuscitation containers cost-effective. Provided sterile and ready for use.

Code	Description	Size	Weight	Box Qty.
8005000	Solus Standard, large adult, laryngeal mask airway	5	70+kg	20
8004000	Solus Standard, medium adult, laryngeal mask airway	4	50–70kg	20
8003000	Solus Standard, small adult, laryngeal mask airway	3	30–50kg	20
8025000	Solus Standard, large paediatric, laryngeal mask airway	2.5	20–30kg	20
8002000	Solus Standard, small paediatric, laryngeal mask airway	2	10–20kg	20

8101000	Supra, neonate, silicone laryngeal mask airway	1	<5kg	20

InTube™ endotracheal tubes

The Intersurgical InTube range of endotracheal tubes offers cuffed and uncuffed ET tubes in a comprehensive range of sizes from paediatric to adult for use in emergency medicine. They are supplied sterile, individually packed, latex free and for single use.

Cuffed

Code	Description	Inner Diameter (ID)	Box Qty.
8040100	InTube, cuffed endotracheal tube	10.0mm	10
8040095	InTube, cuffed endotracheal tube	9.5mm	10
8040090	InTube, cuffed endotracheal tube	9.0mm	10
8040085	InTube, cuffed endotracheal tube	8.5mm	10
8040080	InTube, cuffed endotracheal tube	8.0mm	10
8040075	InTube, cuffed endotracheal tube	7.5mm	10
8040070	InTube, cuffed endotracheal tube	7.0mm	10
8040065	InTube, cuffed endotracheal tube	6.5mm	10
8040060	InTube, cuffed endotracheal tube	6.0mm	10
8040055	InTube, cuffed endotracheal tube	5.5mm	10
8040050	InTube, cuffed endotracheal tube	5.0mm	10
8040045	InTube, cuffed endotracheal tube	4.5mm	10

Uncuffed

Code	Description	Inner Diameter (ID)	Box Qty.
8050070	InTube, uncuffed endotracheal tube	7.0mm	10
8050065	InTube, uncuffed endotracheal tube	6.5mm	10
8050060	InTube, uncuffed endotracheal tube	6.0mm	10
8050055	InTube, uncuffed endotracheal tube	5.5mm	10
8050050	InTube, uncuffed endotracheal tube	5.0mm	10
8050045	InTube, uncuffed endotracheal tube	4.5mm	10
8050040	InTube, uncuffed endotracheal tube	4.0mm	10
8050035	InTube, uncuffed endotracheal tube	3.5mm	10
8050030	InTube, uncuffed endotracheal tube	3.0mm	10
8050025	InTube, uncuffed endotracheal tube	2.5mm	10

InterGuide tracheal tube introducer bougie

InterGuide is a flexible tracheal tube introducer commonly known as a bougie. It allows positive location of the trachea and subsequent placement of the endotracheal tube in difficult airway situations. Supplied sterile, individually packed, latex free and for single use.

Atraumatic coude tip

to reduce the potential for patient trauma

Low-friction surface
for easy insertion and operation

Code	Description	Size	Outer Diameter (OD)	Length	Box Qty.
8070015	InterGuide tracheal tube introducer bougie	15FR	5.0mm	700mm	10
8070010	InterGuide tracheal tube introducer bougie	10FR	3.3mm	700mm	10
8070006	InterGuide tracheal tube introducer bougie	6FR	2.0mm	530mm	10

InterForm intubation stylet

InterForm is a malleable endotracheal stylet, allowing the user to form the endotracheal tube into a suitable shape to ease insertion and give more control of the airway device. Supplied sterile, individually packed, latex free and for single use.

Aluminium core

Allows user to easily form suitable shapes

Low-friction surface
For easy insertion and removal

Code	Description	Size	Outer Diameter (OD)	Length	Box Qty.
8080014	InterForm intubation stylet	14FR	4.7mm	340mm	10
8080010	InterForm intubation stylet	10FR	3.3mm	340mm	10
8080006	InterForm intubation stylet	6FR	2.0mm	275mm	10

OptiLube™ sachets of lubricant

OptiLube sachets of lubricant containing 5g of water soluble lubricating jelly for use in the preparation of airway devices.

Code	Description	Box Qty.
5469000	OptiLube, 5g sachets of lubricant	150

Plastic single-use laryngoscope blades

Intersurgical plastic single-use laryngoscope blades provide a safe, strong, light and cost-effective alternative to reusable metal versions. The range of Miller and Macintosh blades provide effective illumination and visualisation of the airway to aid with intubation and airway clearance. Our blades are compatible with the ISO7376-3 green specification handles, as indicated by the green Intersurgical logo near the heel of the blade.

Engagement to handle click mechanism via two plastic lugs

Provides secure and positive connection of the blade to the handle

Ultra smooth blade with matt finish

Smooth transition into the airway and easy passage of the tube, with no light reflection off the blade

Single construction blade made from high impact grade ABS plastic

Rigid blade which is a cost effective, disposable alternative to reusable and disposable metal blades

High optical light transmission

Provides the user with an excellent light transfer to the blade tip

Code	Description	Size	Box Qty.
7044000	Macintosh Style, plastic single use laryngoscope blades	4	40
7043000	Macintosh Style, plastic single use laryngoscope blades	3	40
7042000	Macintosh Style, plastic single use laryngoscope blades	2	50
7041000	Miller Style, plastic single use laryngoscope blades	1	70
7040000	Miller Style, plastic single use laryngoscope blades	0	70

Nitrous Oxide and Oxygen delivery systems

Code	Description	Box Qty.
2620001	O ₂ /N ₂ O breathing system with mouthpiece and one-way valves, 2.8m	20
2630001	O ₂ /N ₂ O breathing system with mask and one-way valves, 2.8m	20
1644137	Mouthpiece filter kit Clear-Guard™ Midi low volume breathing filter, mouthpiece	50

HyperVent™ bag

The HyperVent bag is designed to facilitate the treatment of hyperventilation. It comprises a housing with integral mouthpiece ensuring it is easy for the patient to hold. This is connected to a strong plastic bag. Unlike paper bags the HyperVent bag does not disintegrate with use, is medically clean and eliminates the risk of inhaling foreign bodies.

Code	Description	Box Qty.
1130000	HyperVent bag	5
